Update Map

New Location

Done

To pick a new location for your listing navigate the map then hit the "New Location" button, and then click the map. The latitude and longitude values will update above. You may also type in the latitude and longitude manually in either decimal degrees format or degree minute seconds format and hit the "Update Map" button to confirm the new location. To save the new location, hit the "Done" button above to return to the listing edit screen and then save the changes.
